High Value Contained in an increment

Considerable experience in varied markets provides RISO with insights on customer requirements across the world.

CV Series from RISO is the result of these valuable insights and RISO's in-house R&D.

It provides all the benefits that our customers desire including cost- and time-saving combined with ease of operation, superior print quality and a user-friendly design.

The CV Series delivers Customer Value, like no other equipment in its class.

Value 1 Excellent print quality

Achieved through RISO's cutting-edge technologies

Improved image processing and resolution provide unmatched print quality at this price point

High-quality printing is achieved by using a higher-resolution thermal head which is normally employed in higher models. The new light source delivers improved color reproducibility of Red and Bright Red. Also, the tonality and resolution have been improved at the highlight range thanks to the enhanced error diffusion processing.

Clear reproduction of fine details

With enhanced resolution, even fine details can be clearly reproduced retaining legibility while preventing moiré.

Quality output from various types of originals

Four image-processing modes: Line, Photo, Duo and Pencil are selectable

Link color variations

A wide range of colors can meet the needs of a variety of print jobs.

Flexible paper handling capability

The CV Series accepts a wide range of paper types including recycled.

Value 2 Convenient and easy operation

Designed with the customer's needs in mind

Easy-to-operate LCD panel

The 128 x 64 dot LCD panel is clearer to view and easier to operate than ever before.

Direct printing with a USB Flash Drive

You can print directly from the data saved in a USB flash drive. This is convenient when the machine is not connected to a PC or network. Also, printing directly from original data ensures better print outputs.

Printed data can be printed via USB

Inbuilt PC interface enables easy connection to a PC.

Design that makes a difference

User-oriented design for extended use

Residual capacity of supplies

Display shows the residual capacity of supplies, thus avoiding an out-of-supply situation.

1 printing

Need to prepare an original before printing. This data processing reduces paper wastage.

Human design

High operation quality output.

New operation panel is designed for intuitive operation, making it user-friendly. The left-to-right keyboard layout provides easy operation for initial setting, master-making and printing.

Compact

Compact design, smooth lines and a sleek body result in reduced size bulk, so fit in even a limited space.

Simple and stylish

The CV Series simple and stylish design makes changing the drum very easy.

RISO i Quality

Recognizes master and link information by two-way communication with attached RF tag and adjusts the performance automatically. This contributes to quality stability and improvement. It also supports inventory control of consumables.

RISO i Quality System

RF tag and link information are stored in the RF tag and link.

High-quality RISO consumables

RISO is the only company to develop and manufacture both the machine and consumables in-house, thus assuring consistent and high quality output.

Eco-friendly

- ENERGY STAR[®] certified
- Complies with the ErP directive in Europe
- Consumes less power and produces less heat

The CV Series consumes much less power for printing than general B&W photocopiers/laser printers.

Energy-saving system

With the introduction of auto cover shut-off and sleep functions, the CV Series supports energy saving.
